**Subject:** RE: CWC- West Block (02-41-587376) VMS Commissioning Info Request

Hi Robert—Thank you for the information. As we previously discussed during our phone call on 08/30, if the RP would like a formal DNR review and response to the revised PFE measurement locations for the second round of VMS commissioning, please present a technical assistance fee and associated documentation.

Best, Jane

Jane,

Please find attached an amended plan which has the same number of subslab vapor measurement points.

Jane,

Please find attached additional air sampling results for the anomalous PCE reading at location IA-8A-01B which was performed on July 27, 2022. Additional sampling was performed at location IA-8A-01B and the apartments on the either side of the PCE reading.

No VALs were exceeded for PCE this time around. PCE in indoor air was detected ranging from 0.54 ug/m3 to 0.68 ug/m3, well below the VAL of 42 ug/m3. TCE was not detected in any of the three samples.

A second round of commissioning is scheduled for later in August. We will be preparing a report summarizing this round of indoor air sampling and the commissioning testing when we receive the results.

Please let me know if you have any questions. Thanks.

Robert T. Reineke, P.E.

I think I found a map showing the fan locations - Please confirm that the "exterior fan locations" shown on the attached figure are correct and that these are the locations where the exhaust samples were collected.

Subject: CWC- West Block (02-41-587376) VMS Commissioning Info Request

Hi Robert,

Can you please provide me with an update on the first round of commissioning for Buildings 4 and 5 for the abovereferenced site? Has the commissioning occurred yet and, if so, when will the results be submitted to the DNR? Additionally, please present a figure that displays the locations of all of the fans (i.e., the exhaust sample locations) on the rooftops of Buildings 6, 7, 8A, and 8B.

Thank you, Jane
